

Erwan Goudard, Product Designer

5 years building B2B fintech products,
bridging design and engineering

Experience

01

Qonto

Frontend Engineer · Product Design Focus 2021 - Present

Qonto is the leading European business finance platform, helping SMEs and entrepreneurs manage their financial operations

Shaped user flows, interaction patterns and Figma prototypes with Product Designers and PMs, then built the production front-end that shipped them, balancing customer needs, business goals and technical feasibility

Shipped 30+ product features across Pricing, Cards, Account Management and Customer Lifecycle, from discovery through delivery

Applied product metrics, customer insights and value analysis to identify retention opportunities, contributing to experiences that helped retain 90+ customer organizations within their first month

Medicalib

Frontend Engineer 2020 - 2021

Medicalib is a healthcare platform connecting patients and healthcare professionals

Built and iterated healthcare workflows using Vue.js, JavaScript and TypeScript, focusing on usability, accessibility and reliability
